

Kapsons Anchor

ABOUT OUR COMPANY

A BRIEF STORY ABOUT THE COMPANY

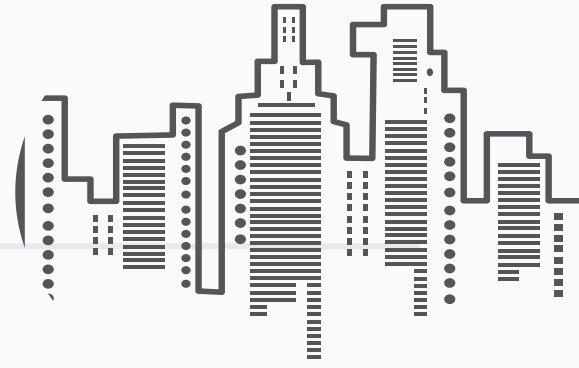

Kapsons valves (India) Pvt. Ltd. is a leading distribution firm specializing in innovative and sustainable building solutions. With years of experience, the company has a reputation for delivering high-quality projects on time and within budget. The diverse client base has provided experience in highly specialized areas of product applications and performance enhancement. Our team of skilled professionals uses state-of-the-art technology and best practices to ensure customer satisfaction.

kapsons Valves is 28-year-old distribution business headquartered in New Delhi, associated with most renowned brands for years

Slope Stabilization & Erosion Control Solutions

Innovative Solutions for a Sustainable Future

At Kapsons, we understand the challenges posed by unstable slopes and the critical importance of erosion control in preserving the integrity of infrastructure and natural landscapes. With our latest range of products, we bring advanced solutions to tackle these challenges head-on, ensuring safety, sustainability, and long-term performance

Our Product Range

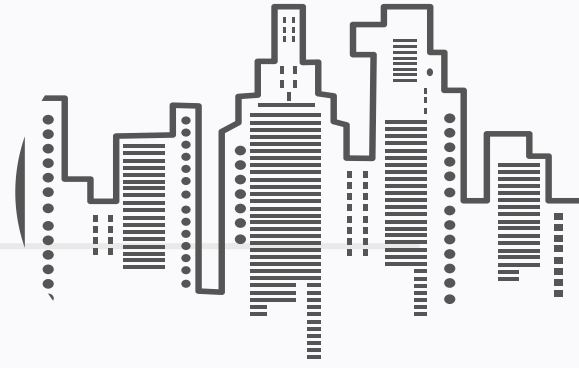

Self-Drilling Anchors (SDA)

Self-drilling anchor comprises a hollow anchor bar that allows for customization based on project requirements, a nut for securing the anchor, a plate for load distribution, a coupler for connecting anchor bars, and a drill bit for seamless penetration of various geological formations.

The self-drilling anchor bolt system distinguishes itself by offering a holistic solution to the challenges posed by complex geological conditions on high slopes. Through the incorporation of drilling, grouting, and anchoring functions within a single system, this innovation streamlines the construction process, ensuring both efficiency and effectiveness.

Turf Reinforcement Mat (TRM)

Our Turf Reinforcement Mat (TRM) is designed to provide superior erosion control and slope stabilization. Made from high-strength synthetic fibres, TRM ensures enhanced vegetation growth while reinforcing the soil structure. It's the ideal solution for areas prone to surface erosion and shallow slope failures.

Engineered Flexible Earth Percussion Anchors

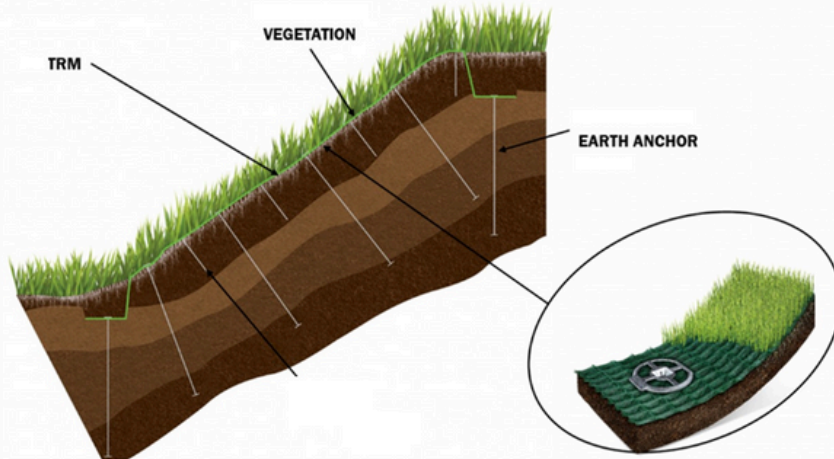

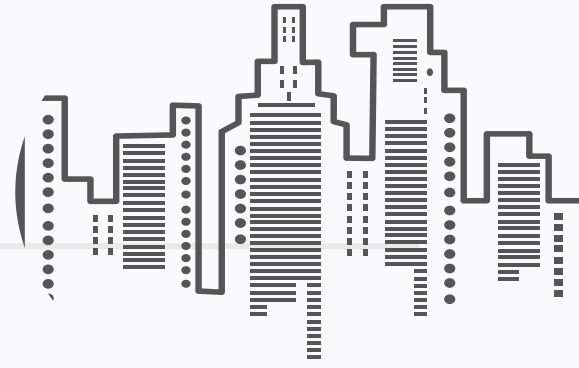

Engineered for reliability, our flexible earth percussion anchors system is designed for more demanding slope stabilization projects. These anchors penetrate deep into the earth, providing robust support to prevent slope failures even in the most challenging conditions. When combined with our TRM, the system offers a comprehensive solution for both surface and deep-seated slope stabilization. The integration of these anchors with our TRM creates a composite system that enhances slope protection.

Double Twisted Wire Mesh (DT Mesh)

At Kapsons, we offer Double Twisted Wire Mesh (DT Mesh) as a reliable solution for slope stabilization and rockfall protection. This mesh, composed of high-strength galvanized steel wire, is designed to withstand the rigors of harsh environmental conditions, providing long-lasting and effective protection against soil erosion and rockfall hazards.

Why Choose Kapsons?

Cutting-Edge Technology: Our products are designed using the latest technology in geotechnical engineering, ensuring that they meet the highest standards of safety and performance.

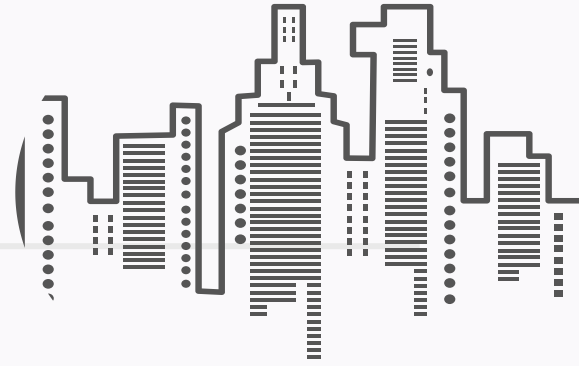

Comprehensive Solutions: From erosion control to deep-seated slope stabilization, our range of products provides a full spectrum of solutions to meet your project needs.

Sustainability: We are committed to offering solutions that not only stabilize slopes but also promote vegetation growth, contributing to a greener environment.

Proven Expertise: With years of experience in civil construction and geotechnical solutions, Kapsons is a name you can trust for your slope stabilization and erosion control projects.

+91- 8800021973

Applications

Our slope stabilization and erosion control products are suitable for a wide range of applications, including:

Highway Embankments

Railway Cuttings

Steep Slopes and Hillsides

Riverbanks and Coastal Areas

Construction Sites

Project Support

At Kapsons, we believe in partnering with our clients to ensure the success of every project. Our team of experts is available to provide technical support, from initial site assessment to the design and installation of our products. We work closely with you to tailor our solutions to the specific requirements of your project, ensuring optimal results.
